Collection clamps

with pre-fitted nail anchor

Collection clamps are used to secure cables and wiring to walls and ceilings. The supplied adapter, located at the base of the clamp, is attached to the surface first; the collection clamp is then simply pushed onto it. The adapter can be secured in a pre-drilled 6 mm hole, for example using a nail anchor, or with a gas-powered or battery-powered setting tool. Collection clamps offer a high capacity of 20 cables of 3 x 1.5 mm² or 40 cables of 3 x 1.5 mm². Additional clamps can be connected to increase capacity without further drilling or fastening.

CE ✓ | halogen free | silicone free | Max. 750°C | PP | RAL 7035

CAPACITY IN MM²	PACK QTY	CTN QTY	ARTICLE NO.
20 x 3 x 1.5	100	400	309140
40 x 3 x 1.5	50	250	309141

With a pre-fitted cylinder-collar nail anchor, size 6 x 50 mm, for quick and precise installation. After drilling the hole, simply hammer in the anchor. Our HUP XpressFixx® products enable strong, accurate and particularly quick installation.
